1. Thanks from Chairman , Oxbridge Soft

Thank you for your interest in OXBRIDGE Soft.

The information contained in this packet provides you with a brief introduction to who we are, what we do, and how OXBRIDGE Soft can be of value to your business. To accomplish this, we present an overview of our services, highlight our capabilities, and offer some brief examples of our experience. The content is broken down as follows:

- Corporate Overview
- Specialization & Expertise
- Available Services
- Rates and Billing
- Development Projects
- Contact Information

Because every client's project poses its own set of unique challenges, it is impossible to compose one document that completely addresses everyone's specific needs. What we have attempted to do in the following pages is simply provide a glimpse into some of our capabilities. OXBRIDGE Soft is a full custom services firm. As such, it's our business to quickly adapt to meet our clients' diverse needs... and we have a proven track record of doing just that.

We are always interested in exploring new projects, so if you're interested in discussing your particular development challenges with us, please contact us at: (603) 28-OXBRIDGE. We're confident that our staff of experienced professionals can be a valuable addition to your team.

Sincerely

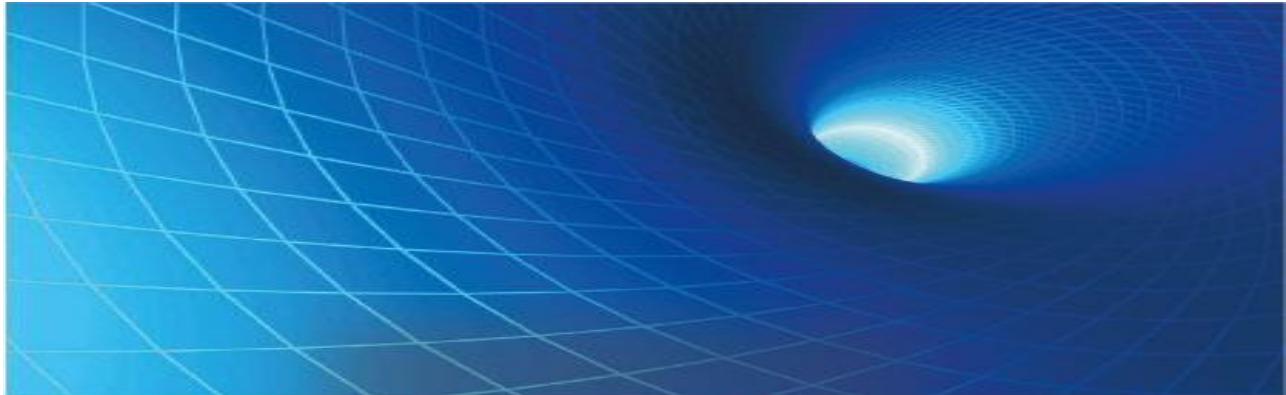

Mr. Firdaus Ismail

Chairman

OXBRIDGE SOFT

Corporate Overview

2. Who We Are...

OXBRIDGE Soft founded by **Mr. Firdaus Ismail** and **Mohd Taslim Uddin Chowdhury** is a custom software services firm based in South Asia. We have extensive experience in many diverse areas of both software and hardware development. Our experienced staff of professionals has worked with a wide array of platforms, languages, and tools in the course of our various projects.

We continuously strive to improve software solutions customized not only to our clients' needs, but also complying with the best practices in industrial area. Our ERP software solutions provide competitive advantage by improving decision-making process and enhancing business performance of customers. Our diverse team of developers, scholars and business professionals understand and provide guidance to our valued clients, ensuring business excellence so that customers enjoy the best services.

3. What We Do...

Quite simply: we write code. However, unlike most software companies, we realize that's only part of the job. We don't just write code... We develop professional software. This is why our clients choose OXBRIDGE Soft. Many companies can find programmers to generate code. However, few have the experience to produce professional quality software.

Our ability to develop code is only the beginning of our capabilities. Being a “custom” firm, OXBRIDGE Soft is able to provide our clients with a variety of services. A few of the services available from OXBRIDGE Soft include:

- System Architecture and Design
- Development
- Project Management
- IT Support and Network Administration
- Complete Turnkey Systems
- Testing and Quality Assurance
- Feasibility Studies
- Technical Documentation and Training Services
- Placement and Recruiting Services

OXBRIDGE Soft services are available on both a fixed and variable cost basis.

4. Partnerships...

Our goal at OXBRIDGE SOFT Software is to become our client's first choice for software services. To accomplish this, we strive to exceed our client's expectations. OXBRIDGE SOFT clients cannot simply be satisfied with the job we do... they must be impressed. In this manner, OXBRIDGE SOFT strives to build lasting partnerships and ensure client satisfaction. It is upon this foundation that our clients are confident in returning for future development needs.

& Experience...

Providing quality software services begins with experience and ends with dedication. OXBRIDGE SOFT Software's professionals have years of experience in design, development, and testing of countless software projects. It is this experience, along with our dedication to giving clients the best quality service possible, which sets OXBRIDGE SOFT apart from other firms.

5. A Proven Track Record of our Professionals and Expertise

OXBRIDGE SOFT has a proven track record of professionals and expertise providing high quality, custom software and project management services. Our experience is broad and spans the complete software development cycle.

Specialization and Expertise

5.1 Dynamic...

As a custom software development firm, OXBRIDGE SOFT has amassed an impressive resume of projects. It's the custom nature of our development projects that has enabled OXBRIDGE SOFT to acquire vast experience in many diverse areas of software development. Our experience, in conjunction with our quality personnel, enables OXBRIDGE SOFT to be dynamic enough to tackle almost any software development project. OXBRIDGE SOFT Professionals has a proud history of utilizing experience to provide our clients with the best services possible. This difficult task is accomplished by applying experienced personnel to every project. OXBRIDGE SOFT was founded on the principle of gathering an elite group of software engineers and professionals, and leveraging their collective abilities. Naturally, each of these "producers" brings their own particular specialization and experience to the table. Once they join the OXBRIDGE SOFT team, we cross-train our consultants to diversify and increase their overall skills. The result for our clients is a group of individuals that can genuinely contribute and have a positive impact on development projects.

5.2 Areas of Expertise...

OXBRIDGE SOFT consultants have experience in many different aspects of the development process. Because we are a custom firm, there are no limits on what projects we can undertake. It is this ability that has enabled OXBRIDGE SOFT to accumulate experience in so many diverse areas.

A few of these include:

- Application Design, Development, and Testing (GUI, Database, etc.)
- Web Development (Internet/Intranet)
- Web-Enabling ERP Applications
- Engineering, Scientific, and Data Collection
- Semiconductor EDA [Electronics Design Automation] Applications
- Point-of-Sale and General Business Services Applications
- System Architecture and Implementation
- Client/Server Applications and Distributed Systems
- Systems Integration
- Platform Migrations and Code Porting
- Object-Oriented Design and Analysis
- Project Management Consulting
- Technical Documentation and Training

No matter what your development challenge, OXBRIDGE SOFT consultants are a valuable resource.

5.3 Languages, Platforms and Tools...

Another advantage of providing custom services is that OXBRIDGE SOFT consultants have gained extensive experience with a wide variety of languages, platforms, and tools during the course of our projects. In addition, OXBRIDGE SOFT consultants have become experts at adjusting quickly when faced with new development environments. We are able to rapidly “come up to speed” on existing projects. The following lists just a few of the languages, platforms, and tools with which we have experience:

- **General Languages:** C#, Oracle, Python, Apex, shell scripting, Angular, React and more
- **Web Technologies:** .NET, XML, HTML, CGI, Java, JSP, J2EE, J2ME, ASP, VBS, Web Servers, Mail Servers, Firewalls, IIS, Apache, Tomcat, and more
- **Platforms:** Windows (XP back to 2.x), Unix (Linux, HP-UX, Solaris, SunOS, AIX), VMS, MacOS
- **Database Engines & APIs:** MySQL, SQL Server, Oracle, Access, and more
- **Tools & Methodologies:** Oracle Developer 10g, 11g (WLS) Microsoft Visual Studio 2019, Android Studio, Adobe Photoshop, Illustrator -2019, and more

5.4 Windows Experience...

In the Windows applications arena, OXBRIDGE SOFT developers have written applications since the first release of Windows 2.x. We know the operating system and have extensive experience with the fundamentals of Windows development. OXBRIDGE SOFT developers have worked on everything from personal nutrition software to GPS satellite tracking systems during the course of our development experience. OXBRIDGE SOFT has implemented countless applications, utilized all aspects of the MS Windows environment (such as ODBC, DDE, OLE, DLLs, drivers and threading), and has gained experience with all the major integrated development environments (IDEs, such as Visual and Borland) In past projects, OXBRIDGE SOFT has ported applications, interfaced with external hardware (scanners, data collection devices, etc.), and implemented distributed network solutions. The first step to developing a Window application is designing the graphical user interface (GUI). An effective GUI is critical to the acceptance and success of any Windows application. Failure to produce an effective GUI will kill even the best application.

5.5 Web Experience...

Although Windows and Web development share many common traits (GUI design, backend database hooks, etc.), there are also many significant differences in the underlying application architectures that one must fully understand to create a successful Web-based application. Over the years OXBRIDGE SOFT has gained this type of experience through our projects in both the Windows and Unix environments. OXBRIDGE SOFT has Web-enabled existing applications, developed numerous Web-based systems, utilized various backend databases, and setup/administered: Web servers, email servers, FTP sites, and firewalls. The Web development market is a fast-paced environment where technology is always changing. We stay abreast of the latest changes in tools and languages including XML, Java, and others.

Available Services

OXBRIDGE SOFT Software provides its clients with a wide range of services spanning the entire development process. Clients can utilize OXBRIDGE SOFT for the entire development cycle or only for selected portions that require additional support and consultation. Our services are available on an hourly or project basis (see Rates and Billing). At OXBRIDGE SOFT, we draw upon our vast experience to provide our customers with the best possible services. As a custom software development firm, there are no limits on what projects we can undertake. However, most software development efforts require the same basic types of services. Some of the common services available from OXBRIDGE SOFT include:

6.1 System Architecture and Design...

Design is often the most critical phase of any software development effort. In many cases, the quality of the finished software is directly proportional to the quality of the initial design. One metaphor is particularly appropriate... Ask yourself this question: What quality of house would you get if you built it with no blueprints? Custom software development is an investment. As with any substantial investment, planning is crucial. However, there is a trade-off. It is possible to over-design. This leads to lost time and money. OXBRIDGE SOFT has the experience to strike the proper balance.

6.2 Development...

The key to quality development is sharp people with a well thought-out plan. Good organization allows developers to modularize the development process. This results in rapid implementation of a system that can be easily tested and expanded for future versions. OXBRIDGE SOFT provides a highly qualified technical staff with years of software development experience.

6.3 Project Management...

OXBRIDGE SOFT clients often require additional consulting and managerial support to supplement their in-house development efforts. OXBRIDGE SOFT is uniquely qualified to provide this vital support. The professionals at OXBRIDGE SOFT have worked on countless software development efforts, and as a result are well equipped to quickly anticipate and address problem areas on a given project. OXBRIDGE SOFT can serve as troubleshooters or, if need be, assume management of an entire project.

6.4 Network Administration...

OXBRIDGE SOFT has IT network professionals familiar with all types of heterogeneous networks. Clients have utilized our services to design, install, and manage their network systems. Some clients have even outsourced the IT support for their entire office to OXBRIDGE SOFT.

6.5 Complete Turnkey Systems...

Complete, integrated systems are no problem for OXBRIDGE SOFT. Integrating hardware and software to form a new automated system is a classic utilization of OXBRIDGE SOFT's resources. OXBRIDGE SOFT has negotiated discount hardware reseller agreements with Network Appliance, Referral Services to help provide our clients with a low-cost source for their hardware needs. No matter what your hardware needs are, from massive file servers down to desktop PCs, OXBRIDGE SOFT can get it for you... and often for less than buying it direct!

6.6 Testing and Quality Assurance...

With our experience in the software development field, OXBRIDGE SOFT can provide an extremely valuable third-party perspective, when brought in to test/QA another vendor's software. System testing is fundamental to the quality of any software. Although many developers take short-cuts and settle for only testing their software during development (Alpha-Testing), we at OXBRIDGE SOFT always encourage our clients to include a distinct testing phase to any software project. This testing phase allows the system to be tested as a completed unit, and is usually done by someone other than the developer. In this manner, additional user feedback on the functionality and usability of the software can be integrated prior to initial release. Completion of the testing phase is accomplished through preliminary use by actual end users of the software in the real world conditions of the client's site (Beta-Testing).

6.7 Feasibility Studies...

Prior to committing substantial resources to a given project, often clients want to obtain more data on the obstacles related to successfully completing the project. OXBRIDGE SOFT team members have experience serving in this “recon” type role. They can quickly and efficiently identify the primary and secondary “hot spots”, then prepare a Feasibility Report for the client. This report contains a ranked list of all the technical, logistical, and managerial problems associated with the proposed project. In addition, it provides preliminary estimates for cost and time.

6.8 Technical Documentation and Training Services...

OXBRIDGE SOFT consultants have developed numerous user manuals, reference guides, and introductory training materials to accompany our custom software over the years. This experience has provided us with the ability to quickly generate production quality documents. Rather than hiring technical writers (who are often unfamiliar with the underlying technology) to extract information from developers, many of our clients simply have OXBRIDGE SOFT develop the supporting materials. OXBRIDGE SOFT consultants have become so good at this in fact, that many clients have engaged OXBRIDGE SOFT for the sole purpose of creating technical documentation and complete training programs.

6.9 Placement and Recruiting Services...

Finding just the right person for a challenging technical staff position can be quite difficult. Standard placement services often provide overwhelming lists of “candidates,” however many of the resumes provided to the client firms are seldom worth reviewing. This is because the placement firms are not technical people and therefore cannot properly filter the resumes for the hiring managers. OXBRIDGE SOFT solves this problem for managers by taking a low volume, high quality approach. With our technical background, we can serve as a front-end filter for managers who don't want to spend their time reviewing every resume with “C” listed as a language.

Rates and Billing

OXBRIDGE SOFT Software Inc. has two general methods of payment for its services: fixed cost and hourly.

Fixed Cost...

Fixed cost is used primarily when there is a clearly defined project. For example, the goals, tasks, and scope of the project are well defined. This method is often used for our application development efforts in the Windows environment. The end project cost is directly proportional to the complexity and scale of the application and are negotiated on a project-by-project basis.

Hourly...

The hourly method is used when these items are less clear. For example, on an R&D project, or when it is not practical to thoroughly define a project up-front due to time limitations or lack of information. This method is more common in the EDA industry. Hourly rates vary based on type of work, the experience level of the person performing the work, and the length of the engagement. Engagement terms are generally: Individual hourly, 3 months, 6 months, and 12 months, with rates decreasing for longer term engagements. Rates range are from \$30/hr for low-end documentation and testing up to \$150/hr and higher for top-level project management and high-end technical development.

Maximize Value...

OXBRIDGE SOFT Software's rates are structured to maximize the value for our clients. Rates are scaled according to the type of work done and the experience of the individual doing the work. OXBRIDGE SOFT staffs projects with the proper combination of team members to maximize the return for the customer thus saving them time and money.

Billing and Payment...

OXBRIDGE SOFT's standard billing practice is to invoice semi-monthly with payment due within two weeks of the invoice date. This practice is used on all hourly contracts unless a separate payment arrangement has been negotiated. Billing terms on fixed price contracts is always defined within the project's contract. These terms generally reflect a percentage up-front, a percentage upon completion of a significant milestone, a percentage upon delivery, and a percentage as a retainer until final acceptance by the client.

Development Projects

8.1 Oxbridge ERP::

A Business ERP for an enterprise with Accounts, Payroll, PF, FDR, Personnel Management, Employee Attendance System, Visitor Management, Inventory, Library, Bazar, Training and Fixed Asset Management , PO Registration, Loan Management, PO's Report Analysis, PO Audit and PO Visit Information System, PO Software for Submitting Reports, Pay-slip to Email for Employees.

Special Features:

- Classified Dashboard
- Modernized Business Processes and Systems
- Integrated system chaining all the functional areas together
- Notification
- Effortlessly communicate information across various departments
- Process Flow Navigation
- Barcode
- Disaster Management
- Cloud Based Software
- Affordable Pricing
- User-friendly Interface
- Customization

8.2 Oxbridge e-Prescription::

A Prescription Management Software for making prescription, patient search, research and patient data analysis for consultant and surgeons of various disciplines.

Medicine Name	Input Dose	Frequency
ABCDerm Ato+ Baume for AD	শরীর ও মুখে লাগাবেন	
ABC Derm shampoo	সন্তুষ্টে ২ দিন মাথায় শ্যাম্পু করবেন	
ABC Derm Maman Fermete(firming cream)	পেটের ফাঁটা দাপে রোজে ২ বার লাগাবেন	
ABC Derm Solaire	রোজে সকালে ৯ টাক মুখে লাগাবেন	
ABCDerm Change Intensif	ডায়াপার বেশ -এ রোজে ২ বার লাগাবেন	
ABCDerm Change preventive	ডায়াপার পরিষ্কারে -এ রোজে ২ বার লাগাবেন	
ABC Derm Lat de toilette for cleansing	শরীর ও মুখ তুলে দিয়ে ওয়াশ করবে	
ABC Derm Hydrant for moisturizing	গোসলের পর শরীর ও মুখে লাগাবেন	

ePrescription Includes:

- ✓ Doctor Setup with Pad
- ✓ [Company](#) Setup
- ✓ [Drug](#) Setup
- ✓ [C.C /History](#) Setup
- ✓ [On Examination](#) Setup
- ✓ [Previous Investigation](#) Setup
- ✓ [Test](#) Setup
- ✓ [Diagnosis](#) Setup
- ✓ [Surgical Treatment](#) Setup
- ✓ [Common Advice](#) Setup
- ✓ [ePrescription Pad](#) : General, Analytical
- ✓ Findings Options:
 - [Investigation Findings](#) : Keeping all sorts of Findings Reports
 - [Surgical Findings](#) : Keeping all sorts of operational video clips
 - Patient Search :
 - [Patient Prescriptions](#) by patient ID
 - [Patient Prescription](#) by presID

8.3 Oxbridge eShefa:

Hospital Management System [ERP]:: Reception, Pathology, Accounts for Diagnostic/Lab, Hospital Indoor and Pharmacy Management

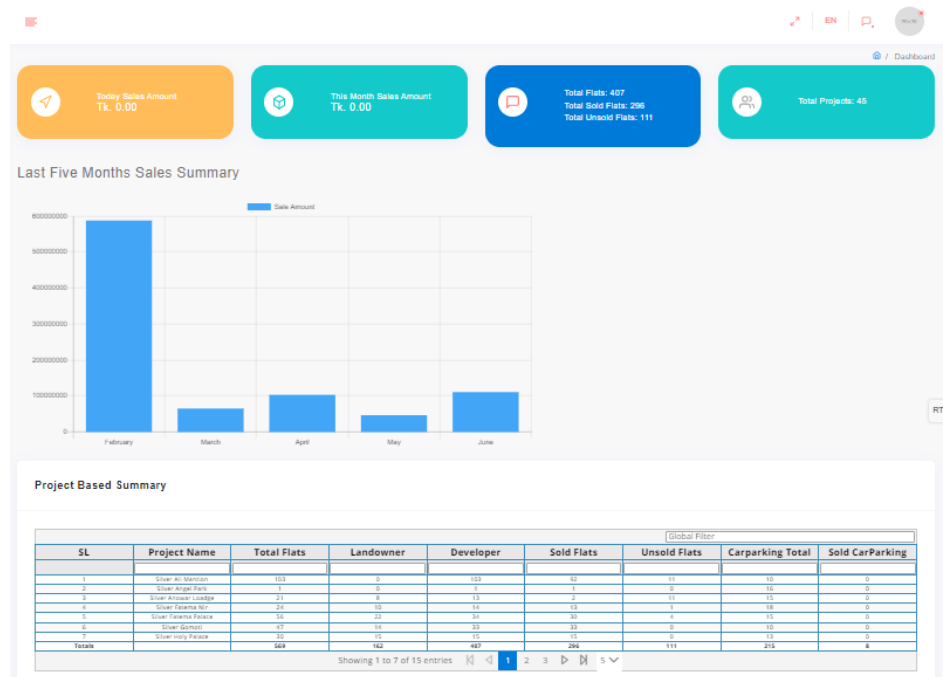

Benefits:

- Instant hospital & treatment Information
- Timely treatment decisions
- Sharing data between the healthcare specialists
- Patient's History at One Click
- Least Manpower Requirements
- Get Access from anywhere and Smart Devices
- Saves Time & Money
- Diagnosis Research
- Medical Tests Reporting
- Cabin, Bed allocation
- Indoor & Outdoor Patient Management
- Online Patient Access
- Analyze the Operational, Clinical and Financial Performance

8.4 Oxbridge Real-estate [ERP] ::

A business solution for any kind of enterprise including **real-estate** management
Developed with ASP.NET C# with Angular-10

Module based specifications:

- ✓ User Management:
 - Employee Setup
 - User Create
 - User Role assignment
- ✓ Office Setup:
 - Vendor/Supplier Ledger Create
 - Customer Registration as your Application Form
 - Project Setup [as your like]
 - Flat Setup [according to project]
- ✓ DSI [Director/Shareholder/Investor] Setup:
 - Creditors Ledger Create [Director info as your Application form]
 - Creditors Ledger Posting [Cash/Cheque] Deposit and Withdraw.
- ✓ Booking Management:
 - Plot Sales
 - Flat Sales

8.5 Oxbridge ePublication::

A business solution for any kind of enterprise including **Publication** management. Developed with ASP.NET C# with Angular-10

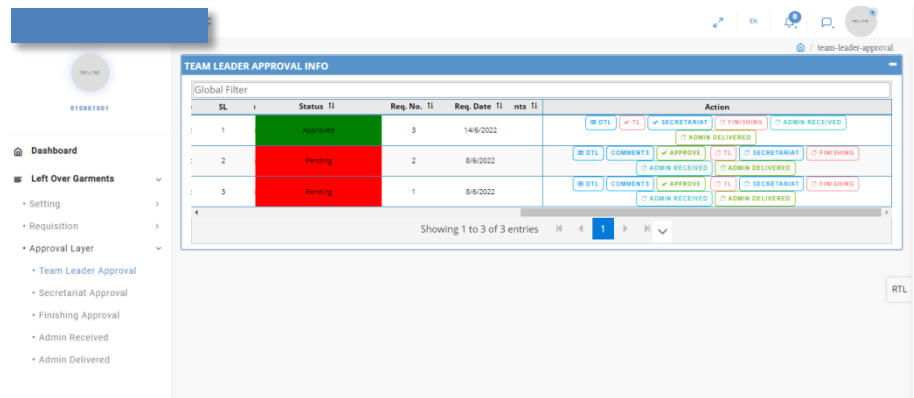

Module based features:

- ✓ User Management System:
 - User Setup and user Create
 - User Role assignment
- ✓ Books Sales and Customer Management:
 - Consists of information like name, address, phone number, email address, purchase histories etc.
 - Sales Invoice with various MIS Reporting System
- ✓ Books Inventory Management:
 - Manages and tracks inventory with re-order reminders in various **color signal**
- ✓ Product Management:
 - Individual or bulk product uploads, add product details, create product bundles, manage variants etc.
- ✓ Supplier Management:
 - Records suppliers' information and contact details.

8.6 Oxbridge Leftover Garments::

A business solution for Leftover Garments' Requisition management System Developed with ASP.NET C# with Angular-10 and Oracle DB

✓ User Management Panel:

- User Create
- User Role assignment

✓ Leftover Garments Management Web:

- Employee Request with Requisition
- Admin Level Approval.
- Request accept or cancel with Factory
- Factory Dispatch the order to Head Admin
- Admin finally submit the approval for the order
- Factory Deliver the challan to see the approved view list

✓ MIS [Management Information System]

- Leftover Garments Reports
 - Date Wise Order Report
 - Order Pending List
 - Order Delivered List
 - Employee wise Report
 - Receiver Wise : Gov. Employee, Personnel,
 - Style list
 - Employee List
 - Receiver List
 - Gift wise List
 - Sample wise List

8.7 Oxbridge Restora::

A restaurant management solution for any kind of restaurant Developed with C#.NET

Module based specifications:

- ✓ Reservation System:
 - Room booking
 - Rooms Layout
 - Easy booking system
 - Cost wise booking
 - Create special group rates
- ✓ Front Office Module:
 - Accessible guest information
 - Guest list, modification, or check-in procedures.
 - Printable registration cards.
 - Displays a graphical room layout
- ✓ Back Office Module:
 - Simplifies accounting processes
 - Updates all accounting records
 - Generate profit-and-loss statement and balance sheet
 - Materials requisitions
 - Purchase, Receiving, Stock Accounting
 - Inventory Management
 - Recipe Management
 - F&B Cost Analysis
 - Debtors Accounting
 - Payables Management
 - General Ledger
- ✓ Housekeeping and maintenance module:
 - Regular assignments of work.
 - Date wise Housekeeping Report
 - Stock Entry Report

8.8 Oxbridge eduCare::

An educational organization management solution for any kind of school, madrasah, college and university developed by Oxbridge.

Module based features:

- User Management System:
 - User Setup and user Create
 - User Role assignment
- Student Fee Management:
 - Student Registration,
 - Student Fee Collection,
 - Due Collection,
 - Student Ledger
- Branch Accounting Systems:
 - Credit Voucher Posting
 - Debit Voucher Posting
 - Cash Book
 - Bank Book : Deposit, Withdraw, Bank Statement
 - Branch Financial Statement
 - Advance Management System
- Main Accounting Systems:
 - Credit Voucher Posting
 - Debit Voucher Posting
 - Cash Book
 - Bank Book : Deposit, Withdraw, Bank Statement
 - Foundation Financial Statement
 - Foundation Balance sheet

8.9 Doctor Web Portal::

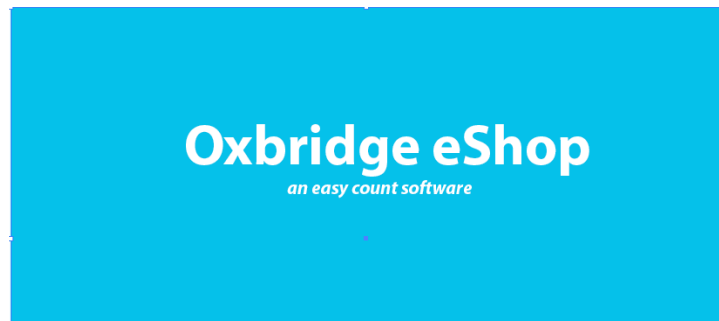

A doctor web portal for verifies discipline doctor with individual portfolio.

8.10 Oxbridge eShop:

Super Shop Management Software::

A super shop management soft with barcoding system and multi outlet monitoring is for any kind of super shop, fashion house, electronics show room, garments etc.

Module based features:

User Management System:

- User Setup and user Create
- User Role assignment
- ✓ Customer Management:
- ✓ Consists of information like name, address, phone number, email address, purchase histories etc.

Inventory Management:

- ✓ Manages and tracks inventory with re-order reminders
- ✓ Product Management:
- ✓ Individual or bulk product uploads, add product details, create product bundles, manage variants etc.
